Electronic Properties of Materials | SpringerLink

The book has a very simplified description for Electronic Properties of Materials. It does not go too much in depth in derivations etc. But at the same time it is good enough to give an overall flavor for electronic, optical, magnetic properties of materials.

Electronic Properties of Materials: Hummel, Rolf E ...

Thermoelectrics (TEs) are materials that convert heat to electricity via the Seebeck effect. This unique ability of TEs is dependent upon electronic and thermal properties. The dimensionless figure of merit (zT) is used to quantify TE performance, and is related to

the conversion efficiency (η).
