How does the city's urban fabric relate to crime and fear, and how is that fabric affected by crime and fear? Does the urban environment affect one's decision to commit an offence? Is there a victimisation-related inequality within cities? How do crime and fear interrelate to inequality and segregation in cities of developing countries? What are the challenges to planning cities which are both safe and sustainable? This book searches for answers to these questions in the nature of the city, particularly in the social interactions that take place in urban space distinctively guided by different land uses and people's activities. In other words, the book deals with the urban fabric of crime and fear. The novelty of the book is to place safety and security issues on the urban scale by (1) showing links between urban structure, and crime and fear, (2) illustrating how different disciplines deal with urban vulnerability to (and fear of) crime (3) including concrete examples of issues and challenges found in European and North American cities, and, without being too extensive, also in cities of the Global South.

Through 19 Native American stories and various activities, children learn the invaluable lesson that all living things are intertwined.

Difficult people are everywhere. Difficult people are those who frustrate us to no end. (In fact, others may view each of us as a difficult person.) We encounter difficult people at home, in the workplace, school, grocery market, anywhere. Often how much they affect us depends on our self-esteem, ability to recognize "hot buttons" and effectiveness of communication skills. Because participants will encounter difficult people in all aspects of their lives, it is important for them to learn a way of dealing with them. In this book, *Coping with Difficult People Workbook*, we teach a specific model that participants can use to build positive relationships with difficult people. The *Coping with Difficult People Workbook* contains assessments and guided self-exploration activities that can be used with a variety of populations to help participants learn to cope more effectively with difficult people. Each chapter of this workbook begins with an annotated Table of Contents with notes and examples for the facilitator. Each chapter contains two primary elements: 1) A set of assessments to help participants gather information about themselves in a focused situation, and 2) a set of guided self-exploration activities to help participants process information and learn effective ways of coping with the difficult people they encounter. Activities are divided into four chapters to help you identify and select assessments easily and quickly: • Chapter 1: Types of Difficult People - This chapter helps participants identify and learn about the various types of difficult people they may encounter. • Chapter 2: Communicating with Difficult People - This chapter helps participants learn their strengths in communicating, and learn more effective ways of communicating with difficult people in their lives. • Chapter 3: Coping Skills - This chapter helps participants explore how well they are coping with difficult people, and learn some alternative techniques for ways to cope. • Chapter 4: Assertive Confrontation Style - This chapter helps participants explore their style in confronting difficult people, and learn effective confrontational tools and techniques. All of the guided activities are fully reproducible for use with your clients/participants.

Sustainability defines the need for any society to live within the constraints of the land's capacity to deliver all natural resources the society consumes. This book compares the general differences between Native Americans and western world view towards resources. It will provide the 'nuts and bolts' of a sustainability portfolio designed by indigenous peoples. This book introduces the ideas on how to link nature and society to make sustainable choices. To be sustainable, nature and its endowment needs to be linked to human behavior similar to the practices of indigenous peoples. The main goal of this book is to facilitate thinking about how to change behavior and to integrate culture into thinking and decision-processes.

This work represents the first comparative study of the folk revival movement in Anglophone Canada and the United States and combines this with discussion of the way folk music intersected with, and was structured by, conceptions of national affinity and national identity. Based on original archival research carried out principally in Toronto, Washington and Ottawa, it is a thematic, rather than general, study of the movement which has been influenced by various academic disciplines, including history, musicology and folklore. Dr Gillian Mitchell begins with an introduction that provides vital context for the subject by tracing the development of the idea of 'the folk', folklore and folk music since the nineteenth century, and how that idea has been applied in the North American context, before going on to examine links forged by folksong collectors, artists and musicians between folk music

and national identity during the early twentieth century. With the 'boom' of the revival in the early sixties came the ways in which the movement in both countries proudly promoted a vision of nation that was inclusive, pluralistic and eclectic. It was a vision which proved compatible with both Canada and America, enabling both countries to explore a diversity of music without exclusiveness or narrowness of focus. It was also closely linked to the idealism of the grassroots political movements of the early 1960s, such as integrationist civil rights, and the early student movement. After 1965 this inclusive vision of nation in folk music began to wane. While the celebrations of the Centennial in Canada led to a re-emphasis on the 'Canadianness' of Canadian folk music, the turbulent events in the United States led many ex-revivalists to turn away from politics and embrace new identities as introspective singer-songwriters. Many of those who remained interested in traditional folk music styles, such as Celtic or Klezmer music, tended to be very insular and conservative in their approach, rather than linking their chosen genre to a wider world of folk music; however, more recent attempts at 'fusion' or 'world' music suggest a return to the eclectic spirit of the 1960s folk revival. Thus, from 1945 to 1980, folk music in Canada and America experienced an evolving and complex relationship with the concepts of nation and national identity. Students will find the book useful as an introduction, not only to key themes in the folk revival, but also to concepts in the study of national identity and to topics in American and Canadian cultural history. Academic specialists will encounter an alternative perspective from the more general, broad approach offered by earlier histories of the folk revival movement.

In *Appeal to the People's Court: Rethinking Law, Judging, and Punishment*, Vincent Luizzi turns to the goings on in courts at the lowest level of adjudication for fresh insights for rethinking these basic features of the legal order.

For four hundred years--from the first Spanish assaults against the Arawak people of Hispaniola in the 1490s to the U.S. Army's massacre of Sioux Indians at Wounded Knee in the 1890s--the indigenous inhabitants of North and South America endured an unending firestorm of violence. During that time the native population of the Western Hemisphere declined by as many as 100 million people. Indeed, as historian David E. Stannard argues in this stunning new book, the European and white American destruction of the native peoples of the Americas was the most massive act of genocide in the history of the world. Stannard begins with a portrait of the enormous richness and diversity of life in the Americas prior to Columbus's fateful voyage in 1492. He then follows the path of genocide from the Indies to Mexico and Central and South America, then north to Florida, Virginia, and New England, and finally out across the Great Plains and Southwest to California and the North Pacific Coast. Stannard reveals that wherever Europeans or white Americans went, the native people were caught between imported plagues and barbarous atrocities, typically resulting in the annihilation of 95 percent of their populations. What kind of people, he asks, do such horrendous things to others? His highly provocative answer: Christians. Digging deeply into ancient European and Christian attitudes toward sex, race, and war, he finds the cultural ground well prepared by the end of the Middle Ages for the centuries-long genocide campaign that Europeans and their descendants launched--and in places continue to wage--against the New World's original inhabitants. Advancing a thesis that is sure to create much controversy, Stannard contends that the perpetrators of the American Holocaust drew on the same ideological wellspring as did the later architects of the Nazi Holocaust. It is an ideology that remains dangerously alive today, he adds, and one that in recent years has surfaced in American justifications for large-scale military intervention in Southeast Asia and the Middle East. At once sweeping in scope and meticulously detailed, *American Holocaust* is a work of impassioned scholarship that is certain to ignite intense historical and moral debate.

The first history of the United States told from the perspective of indigenous peoples
Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. With growing support for movements such as the campaign to abolish Columbus Day and replace it with Indigenous Peoples' Day and the Dakota Access Pipeline protest led by the Standing Rock Sioux Tribe, *An Indigenous Peoples' History of the United States* is an essential resource providing historical threads that are crucial for understanding the present. In *An Indigenous Peoples' History of the United States*, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up peoples' history radically reframes US history and explodes the silences that have haunted our national narrative. *An Indigenous Peoples' History of the United States* is a 2015 PEN Oakland-Josephine Miles Award for Excellence in Literature. Traces the progress of the Indians of North America from the time of the Creation to the present.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."
