The warning module of a Mariner outboard engine samples the engine temperature and oil level of the motor, the function of the engine overheating sensor, the ignition control module and the engine control module. Many of the operations conducted to troubleshoot the warning module are as simple as testing its reporting ...

How to Troubleshoot the Warning Module on a Mariner Engine ...

Afternoon everyone/anyone!! I have a Mercury 150 Efi(2 stroke) and on the last trip off Onslow, I had 2 alarms going off. The first was 4 beeps every few minutes. The second was a constant beep and the only way to get it off was to turn the engine off and restart. The boat would cavitate at about 3100 rpm and then the alarm would start.
