LatinAsian Cartographies examines how Latina/o and Asian American writers provide important counter-narratives to the stories of racial encroachment that have come to characterize twenty-first century dominant discourses on race. Susan Thananopavarn contends that the Asian American and Latina/o presence in the United States, although often considered marginal in discourses of American history and nationhood, is in fact crucial to understanding how national identity has been constructed historically and continues to be constructed in the present day. Thananopavarn creates a new "LatinAsian" view of the United States that emphasizes previously suppressed aspects of national history, including imperialism, domestic racism during World War II, Cold War operations in Latin America and Asia, and the politics of borders in an age of globalization. LatinAsian Cartographies ultimately reimagines national narratives in a way that transforms dominant ideas of what it means to be American.

This book is the first collection on the British author Rose Macaulay (1881-1958). The essays establish connections in her work between modernism and the middlebrow, show Macaulay's attentiveness to reformulating contemporary depictions of gender in her fiction, and explore how her writing transcended and celebrated the characteristics of genre, reflecting Macaulay's responses to modernity. The book's focus moves from the interiorized self and the psyche's relations with the body, to gender identity, to the role of women in society, followed by how women, and Macaulay, use language in their strategies for generic self-expression, and the environment in which Macaulay herself and her characters lived and worked. Macaulay was a particularly modern writer, embracing technology enthusiastically, and the evidence of her treatment of gender and genre reflect Macaulay's responses to modernism, the historical novel, ruins and the relationships of history and structure, ageing, and the narrative of travel. By presenting a wide range of approaches, this book shows how Macaulay's fiction is integral to modern British literature, by its aesthetic con-

cerns, its technical experimentation, her concern for the autonomy of the individual, and for the financial and professional independence of the modern woman. There are manifold connections shown between her writing and contemporary theology, popular culture, the newspaper industry, pacifist thinking, feminist rage, the literature of sophistication, the condition of 'inclusionary' cosmopolitanism, and a haunted post-war understanding of ruin in life and history. This rich and interdisciplinary combination will set a new agenda for international scholarship on Macaulay's works, and reformulate contemporary ideas about gender and genre in twentieth-century British literature.

The canon of postwar American fiction has changed over the past few decades to include far more writers of color. It would appear that we are making progress—recovering marginalized voices and including those who were for far too long ignored. However, is this celebratory narrative borne out in the data? Richard Jean So draws on big data, literary history, and close readings to offer an unprecedented analysis of racial inequality in American publishing that reveals the persistence of an extreme bias toward white authors. In fact, a defining feature of the publishing industry is its vast whiteness, which has denied nonwhite authors, especially black writers, the coveted resources of publishing, reviews, prizes, and sales, with profound effects on the language, form, and content of the postwar novel. Rather than seeing the postwar period as the era of multiculturalism, So argues that we should understand it as the invention of a new form of racial inequality—one that continues to shape the arts and literature today. Interweaving data analysis of large-scale patterns with a consideration of Toni Morrison's career as an editor at Random

House and readings of individual works by Octavia Butler, Henry Dumas, Amy Tan, and others, So develops a form of criticism that brings together qualitative and quantitative approaches to the study of literature. A vital and provocative work for American literary studies, critical race studies, and the digital humanities, *Redlining Culture* shows the importance of data and computational methods for understanding and challenging racial inequality.

Leviathan or The Matter, Forme and Power of a Common-Wealth Ecclesiastical and Civil is a book written by an English materialist philosopher Thomas Hobbes about problems of the state existence and development. Leviathan is a name of a Bible monster, a symbol of nature powers that belittles a man. Hobbes uses this character to describe a powerful state ("God of the death"). He starts with a postulate about a natural human state ("the war of all against all") and develops the idea "man is a wolf to a man". When people stay for a long time in the position of an inevitable extermination they give a part of their natural rights, for the sake of their lives and general peace, according to an unspoken agreement to someone who is obliged to maintain a free usage of the rest of their rights - to the state. The state, a union of people, where the will of a single one (the state) is compulsory for everybody, has a task to regulate the relations between all the people. The book was banned several times in England and Russia.

Speculative modernists--that is, British and American writers of science fiction, fantasy and horror during the late 19th and early 20th centuries--successfully grappled with the same forces that would drive their better-known literary counterparts to existential despair. Building on the ideas of the 19th-century Gothic and

utopian movements, these speculative writers anticipated literary Modernism and blazed alternative literary trails in science, religion, ecology and sociology. Such authors as H.G. Wells and H.P. Lovecraft gained widespread recognition--budding from them, other speculative authors published fascinating tales of individuals trapped in dystopias, of anti-society attitudes, post-apocalyptic worlds and the rapidly expanding knowledge of the limitless universe. This book documents the Gothic and utopian roots of speculative fiction and explores how these authors played a crucial role in shaping the culture of the new century with their darker, more evolved themes.

A classic, reimagined.

Alice in Wonderland (also known as *Alice's Adventures in Wonderland*), from 1865, is the peculiar and imaginative tale of a girl who falls down a rabbit-hole into a bizarre world of eccentric and unusual creatures. Lewis Carroll's prominent example of the genre of "literary nonsense" has endured in popularity with its clever way of playing with logic and a narrative structure that has influenced generations of fiction writing.

As education continues to take great strides to become more inclusive and understanding of diverse students and cultures, teaching practices and methods for learning are an essential part of the puzzle and must be addressed to create culturally responsive educational experiences. Teachers must make meaningful connections between a student's culture, language, life experiences, and background to what the student is learning in the classroom. By integrating culture into the classroom, student achievement can be fostered, and students can excel. Underserved populations may face discrimination when it comes to culture, language, or race, and their needs can often be neglected. By implementing culturally responsive teaching, students can feel valued, motivated, understood, and included in their education. The Research Anthology on Culturally Responsive Teaching and Learning displays the best practices and lessons learned for culturally responsive teaching and learning across different types of institutions, classroom subjects, and with different types of students from diverse cultural backgrounds. The chapters focus on culturally responsive practices and how these methods for teaching can impact student success, empowerment, and cultural competence. This book is essential in understanding cultural diversity and inequity in education as well as the ways to address it. This book is ideal for faculty, teachers, counselors, administrators, principals, curriculum

developers, instructional designers, professionals, researchers, and students seeking to improve their understanding of culturally responsive teaching and learning.

Exploring the surprising presence of Christian Science in American literature at the turn of the 20th century, L. Ashley Squires reveals the rich and complex connections between religion and literature in American culture. Mary Baker Eddy’s Church of Christ, Scientist was one of the fastest growing and most controversial

religious movements in the United States, and it is no accident that its influence touched the lives and work of many American writers, including Frances Hodgson Burnett, Willa Cather, Theodore Dreiser, Upton Sinclair, and Mark Twain. Squires focuses on personal stories of sickness and healing—whether supportive or deeply critical of Christian Science’s recommendations --penned in a moment when the struggle between religion and science framed debates about how the United States was to become a modern nation. As outsized personalities and outlandish rhetoric took to the stage, Squires examines how the poorly understood Christian Science movement contributed to popular narratives about how to heal the nation and advance the cause of human progress.

The rise of the Christian Right took many writers and literary critics by surprise, trained as we were to think that religions waned as societies became modern. In *If God Meant to Interfere*, Christopher Douglas shows that American writers struggled to understand and respond to this new social and political force. Religiously inflected literature since the 1970s must be understood in the context of this unforeseen resurgence of conservative Christianity, he argues, a resurgence that realigned the literary and cultural fields. Among the writers Douglas considers are Marilynne Robinson, Barbara Kingsolver, Cormac McCarthy, Thomas Pynchon, Ishmael Reed, N. Scott Momaday, Gloria Anzaldúa, Philip

Roth, Carl Sagan, and Dan Brown. Their fictions engaged a wide range of topics: religious conspiracies, faith and wonder, slavery and imperialism, evolution and extraterrestrial contact, alternate histories and ancestral spiritualities. But this is only part of the story. Liberal-leaning literary writers responding to the resurgence were sometimes confused by the Christian Right's strange entanglement with the contemporary paradigms of multiculturalism and postmodernism—leading to complex emergent phenomena that Douglas terms "Christian multiculturalism" and "Christian postmodernism." Ultimately, *If God Meant to Interfere* shows the value of listening to our literature for its sometimes subterranean attention to the religious and social upheavals going on around it.

American Literature in Transition, 1910-1920 offers provocative new readings of authors whose innovations are recognized as inaugurating Modernism in US letters, including Robert Frost, Willa Cather, T. S. Eliot, Ezra Pound, Gertrude Stein, H. D., and Marianne Moore. Gathering the voices of both new and established scholars, the volume also reflects the diversity and contradictions of US literature of the 1910s. 'Literature' itself is construed variously, leading to explorations of jazz, the movies, and political writing as well as little magazines, lantern slides, and

sports reportage. One section of thematic essays cuts across genre boundaries. Another section oriented to formats drills deeply into the workings of specific media, genres, or forms. Essays on institutions conclude the collection, although a critical mass of contributors throughout explore long-term literary and cultural trends - where political repression, race prejudice, war, and counterrevolution are no less prominent than experimentation, progress, and egalitarianism.
