Desier tter Unit Assessment Study Guide 7. is a measure of the

force of gravity on an object. It can depending on its Mars has about one-third of Earth's gravity. If something weighs 1200 pounds on Earth, it will weigh 400 pounds on Mars.

In the international system of measurement (S.I.) the ampere (A) is the basic measure of electrical current. It is defined as the constant current which, if maintained in two straight parallel conductors of infinite length, of negligible circular cross-section, and placed 1 metre (m) apart in vacuum, would produce between these conductors a force equal to 2×10^{-7} newton (N) per metre of length.

How to Prepare for the Measurement Questions on a Math Test
General Information. Measuring is just using numbers to describe
something—a size, a weight, a volume, etc. It's the different units
that can trip you up. Something that measures 7 meters is huge
compared to something that measures 7 millimeters and you
need to know the difference.
