VM Motori, founded in 1947, is one of the few companies in the

world to exclusively design and produce diesel engines at its plant in Cento (Italy). Major investments in R&D, together with the use of modern technology, put VM at the forefront of marine applications. The current engine range is the result of our philosophy of producing high performance engines in respect of the most severe emissions limits.

These are two VM Mercruiser 220hp diesel engines awaiting to be dismantled to rectify damage caused by water ingress after the boat sunk in the harbour. They were both stripped down to a bare cylinder block to check for corrosion and any wear. The engine on the left, was examined for overheating damage caused by a leaking water circulation pump which led to a low coolant situation allowing the engine to over heat which then caused damage to the cylinder heads and gaskets.
